

Daniel Andres Jimenez Riveros, MSc-MA

Vancouver, BC, Canada | da.jimenez166@gmail.com | linkedin.com/in/daniel-jimenez-78500117a | github.com/daanjiri

Professional Summary

Machine Learning Software Engineer with 7+ years of experience across AI/ML, software engineering, data, and analytics. Experienced in leading the design, development, deployment, and monitoring of production AI systems, ML platforms, and data-driven software products. Hands-on expertise with Python, PyTorch, TensorFlow, SQL, AWS, Azure, MLOps, GenAI, NLP, and computer vision. Results-oriented problem solver with a strong record of translating ambiguous business challenges into scalable technical solutions and collaborating with engineering, product, data, and business stakeholders.

Work Experience

Apexon, Vancouver, BC, Canada

Senior GenAI Engineer

June 2025 - Present

- **Projected +\$0.8B in net new first-year revenue from prioritized ISV verticals** by designing and developing an AI solution for a payment platform, translating ambiguous business requirements into scalable automation with Python, AWS, LangGraph, and integrated ML models.
- **Achieved 96% performance in a production RAG system** by architecting, evaluating, and monitoring retrieval pipelines with AWS OpenSearch, S3, Bedrock, LangGraph, Anthropic Claude, and OpenAI APIs; validated quality with DeepEval and Ragas and implemented Langfuse observability.
- **Developed and maintained the production product across ReactJS, FastAPI, .NET, DAPR, and C++ microservices**, collaborating with engineering and product stakeholders on cross-stack integration and delivery decisions.

Arkangel AI, Remote

Senior Machine Learning Engineer / Project Lead

June 2024 - June 2025

- **Led the Pandora project end-to-end, delivering an AI system used by 45,000+ users** for electronic health record extraction with AWS Fargate, Docker, RAG, LangGraph, FastAPI, and Hugging Face Transformers.
- **Led delivery of an automated ML/DL platform generating up to \$50k in monthly revenue**, covering model training, evaluation, deployment, and monitoring with AWS SageMaker, PyTorch, CloudWatch, Lambda, S3, and NextJS.
- **Reduced processing time and cost by 70%** by leading document AI solutions for invoice processing and provider verification using OpenCV, PyTorch, VLMs, OCR workflows, and Azure services.

AMAZON, Remote

Software Developer Engineer

July 2022 - August 2023

- **Enabled 300+ e-commerce leaders** by architecting scalable backend services and RESTful APIs in TypeScript, ExpressJS, and NodeJS with AI-driven insights and real-time data processing capabilities.
- **Supported 9,000+ Amazon employees and analyzed 500,000+ customer service transactions** by developing full-stack analytics products with ReactJS, Flask, and NodeJS and automated Python data pipelines that produced actionable recommendations.

Information Technology Intern

January 2021 - July 2021

- **Delivered UI/UX and front-end development for internal tools supporting 3 internal teams**, designing responsive ReactJS dashboards with Figma prototypes and SAS-based analytics integration for real-time data visualization and intuitive user experiences.

AQSTICA S.A.S, Bogotá, Colombia

Business Intelligence Analyst

February 2018 - November 2020

- **Improved targeted marketing and audience segmentation by 20%** through big data analytics, unsupervised learning, and predictive modeling in Python.
- **Improved data quality by 25% and reduced processing time by 40%** by developing automated data pipelines with Python, SQL, and MongoDB for large-scale analytics.

Education

University of British Columbia, Vancouver, Canada - Master of Data Science in Computational Linguistics (2023-2024)

Universidad de los Andes, Bogotá, Colombia - Master in Information Technology (2018-2020) - Bachelor in Industrial Engineering (2014-2018) - Bachelor in Arts (2014-2018)

Fundacion Universitaria Jorge Tadeo Lozano, Bogotá, Colombia - Graduate Diploma in Project Management (2017)

Selected Projects

Thorcast AI	2025 - Present
• Generating \$5k+ monthly revenue by building an on-premise Electron desktop application for banks that creates risk ML/DL models in minutes instead of months, automating the full pipeline (data ingestion, feature engineering, model training, evaluation) with an AI agent powered by Python, FastAPI, LangGraph, PyTorch, and Ollama for on-premise LLM inference.	
Alzheimer's Detection — UBC Master's Thesis	March 2024 - August 2024
• Achieved 90% recall in Alzheimer's detection model by developing and optimizing deep learning algorithms using PyTorch and TensorFlow, implementing transformer-based models and CNNs for multi-modal analysis (speech + imaging), with hyperparameter tuning and rigorous model evaluation using transfer learning techniques.	

Awards & Achievements

• COLFUTURO Scholarship	2023
• Data Science for All (DS4A)	2018

Skills

Machine Learning & AI: Python, PyTorch, TensorFlow, Scikit-learn, Hugging Face Transformers, ML/DL, GenAI, RAG, LangGraph, LangChain, NLP, Computer Vision (OpenCV), Model Evaluation | **ML Engineering & Cloud:** AWS (SageMaker, Lambda, Fargate, S3, Bedrock, CloudWatch, OpenSearch), Azure, Docker, Kubernetes, MLflow, Weights & Biases, CI/CD, Model Deployment and Monitoring | **Software & Data Engineering:** SQL, TypeScript, JavaScript, C++, Java, C#, .NET, FastAPI, ReactJS, NodeJS, RESTful APIs, Microservices, Big Data Analytics, Data Pipelines, Software Product Design | **Leadership & Delivery:** End-to-End Project Leadership, Critical Thinking, Decision Making, Results-Oriented Delivery, Business Problem Translation, Cross-Functional Collaboration, Stakeholder Communication
