

Daniel Andres Jimenez Riveros, MSc-MA

Vancouver, BC, Canada | da.jimenez166@gmail.com | linkedin.com/in/daniel-jimenez-78500117a

Professional Summary

Experienced Applied Scientist and former Amazon Software Developer, specializing in large-scale machine learning models and generative AI applications. Over 6 years of experience developing and deploying ML models for real-world applications, with expertise in deep learning, NLP, and transformers. Proficient in building scalable solutions using cloud platforms and modern ML frameworks.

Work Experience

Arkangel AI, Remote

Senior Machine Learning Engineer

June 2024 - Present

- Designed and deployed large-scale generative AI applications using LLMs, transformers, and vector databases that impacted over 2,000 patients by streamlining healthcare communication and reducing average response times by 40%.
- Achieved 95% recall in developing an AI agent utilizing LangGraph, transformer architectures, and fine-tuned OpenAI models to accurately extract risk factors from electronic health records.
- Generated over \$200K in annual revenue by building an AutoML and DL training platform using PyTorch and Python for medical tabular data processing, leveraging AWS SageMaker for deployment.
- Reduced operational costs by 20% for a healthcare institution by developing a robust deep learning computer vision model, utilizing advanced model architectures and NLP techniques at scale.

The University of British Columbia, Vancouver, British Columbia, Canada

Graduate Research Assistant

March 2024 - August 2024

- Achieved 90% recall in developing deep learning algorithms for Alzheimer's detection through transformer-based speech and text models, optimizing for performance at scale.
- Streamlined policy-making for 121,000 war victims using production-grade RAG techniques with LangChain and LLMs, demonstrating expertise in applying generative AI to complex real-world problems.
- Implemented and optimized NLP models using dependency parsing and transformer architectures, improving downstream ML model performance by 30%.

Rocketbrew, Vancouver, British Columbia, Canada - Co-op

Computational Linguistic Engineer

April 2024 - July 2024

- Achieved an 80% increase in engagement rates by creating a scalable message generation pipeline using transformer-based NLP models and LLMs for personalized audience targeting.
- Built a knowledge base with detailed information on 8,000+ companies, enabling targeted marketing and improving product sales strategies with ML-driven audience modeling.
- Developed a distributed data extraction system processing 10,000+ websites using custom NLP models, embeddings, and parallel processing techniques for efficient large-scale data collection.

AMAZON, Remote

Software Developer Engineer

July 2022 - August 2023

- Increased 2,000+ data analysts decision-making efficiency for customer service with advance dashboards in Javascript, ReactJS, D3.js, Redux RTK.
- Empowered over 300+ e-commerce leaders by architecting scalable services and RESTful APIs in TypeScript, ExpressJS, and NodeJS.

Business Intelligence Analyst

July 2021 - July 2022

- Achieved 90%+ accuracy in machine learning models (regressions, time series, neural networks), enhancing operational marketing decisions using Scikit-learn and PyTorch.
- 30% boost in product optimization and development through strategic ML model selection and feature engineering using EDA insights.
- Achieved a 50% reduction in data processing time, significantly accelerating project timelines by streamlining data preprocessing workflows with Python.

Information Technology Intern

January 2021 - July 2021

- Benefited 9,000+ Amazon employees by developing critical internal tools with JavaScript, React, Flask, NodeJS, enhancing usability and productivity
- Analyzed 500,000+ customer service transactions using Python (Pandas, Matplotlib) to visualize data, identify key trends, and inform strategic decisions.

AQSTICA S.A.S, Bogotá, Colombia

Business Intelligence Analyst

February 2018 - November 2020

- **20% improvement in targeted marketing and audience segmentation** using unsupervised learning techniques and predictive modeling in Python.
- **Designed and implemented end-to-end data pipelines** using Python, SQL and MongoDB, enhancing data quality by 25% and cutting processing time by 40% for large-scale analytics.

Education

University of British Columbia, Vancouver, Canada - Master of Data Science in Computational Linguistics
Universidad de los Andes, Bogotá, Colombia - Master in Information Technology - Bachelor in Industrial Engineering - Bachelor in Arts
Fundacion Universitaria Jorge Tadeo Lozano, Bogotá, Colombia - Graduate Diploma in Project Management

Awards & Achievements

- COLFUTURO Scholarship 2023
- Data Science for All (DS4A) 2018

Skills

Applied Science & ML: Deep Learning, Generative AI, Large Language Models, Transformers, Neural Networks, Reinforcement Learning, NLP, Machine Learning at Scale, PyTorch, TensorFlow | **Programming:** Python, R, SQL, Pandas, NumPy, Scikit-learn, TypeScript, JavaScript, Java, C++ | **Big Data & Cloud:** AWS (EC2, S3, Lambda, SageMaker), Azure ML, Distributed Computing, Data Pipelines, MongoDB, DynamoDB | **Software Engineering:** Full-stack Development, Flask, Node.js, React, Data Structures, Algorithms, System Design
