

Daniel Andres Jimenez Riveros, MSc-MA

Vancouver, BC, Canada | da.jimenez166@gmail.com | linkedin.com/in/daniel-jimenez-78500117a

Professional Summary

AI/ML Engineer with 5+ years of experience in machine learning solutions, model deployment, and production systems. Expertise in developing intelligent applications using advanced AI techniques, cloud platforms, and modern ML frameworks. Proven track record in building scalable AI systems with robust monitoring and automated workflows.

Work Experience

Arkangel AI, Remote

Senior Machine Learning Engineer

June 2024 - Present

- **Targeted \$12B+ LATAM healthcare market** by developing an AI agent for Electronic Health Records (EHR) using AWS Fargate, Docker, RAG techniques, LangGraph and FastAPI, implementing semantic search and contextual retrieval for intelligent data processing.
- **Generated up to \$50k monthly revenue** by implementing MLOps pipelines with AWS SageMaker, Pytorch, Cloudwatch, Lambda, and S3, deploying scalable ML models for tabular data training with automated model monitoring and CI/CD integration, reducing infrastructure costs by 50%.
- **Reduced time and cost by 70%** by developing document AI solutions using computer vision and VLM models for automated invoice processing and provider verification, implementing unstructured data extraction and processing workflows for healthcare institutions using Azure cloud services.

Insightly, San Francisco, CA & Colombia

AI Consultant

March 2025 - Present

- **Impacted 1,000+ legal cases** by consulting on intelligent chatbot and AI agent development for enterprise case management systems, recommending Amazon Bedrock, FastAPI, NextJS, LangChain, and FAISS vector database with knowledge graph implementation.
- **Managed a team of junior AI developers** to build AI-driven products, providing technical guidance and mentorship to accelerate development timelines and ensure best practices implementation.

The University of British Columbia, Vancouver, British Columbia, Canada

Graduate Research Assistant

March 2024 - August 2024

- **Achieved 90% recall in Alzheimer's detection model** by developing and optimizing deep learning algorithms using PyTorch, implementing transformer-based models with hyperparameter tuning and rigorous model evaluation for NLP and speech recognition applications.

Rocketbrew, Vancouver, British Columbia, Canada - Co-op

Computational Linguistic Engineer

April 2024 - July 2024

- **Processed 10,000+ websites** using automated web crawlers with LLMs and NLP for unstructured data extraction, implementing document processing and text extraction workflows to gather valuable lead intelligence.
- **Built and maintained a comprehensive knowledge database with information on 8,000+ companies**, implementing NoSQL (MongoDB) and SQL solutions for efficient data storage, retrieval, and real-time analytics.

AMAZON, Remote

Software Developer Engineer

July 2022 - August 2023

- **Managed 2 junior developers** while leading full-stack development of customer service dashboards, implementing efficient ML inference pipelines using JavaScript, ReactJS, D3.js, Redux RTK, and microservices architecture.
- **Empowered over 300+ e-commerce leaders** by architecting scalable backend services and RESTful APIs in TypeScript, ExpressJS, and NodeJS, integrating AI-driven insights and real-time data processing capabilities.

Information Technology Intern

January 2021 - July 2021

- **Benefited 9,000+ Amazon employees** by developing full-stack analytical tools for internal use, leveraging JavaScript, ReactJS, Flask, and NodeJS with real-time data processing capabilities.
- **Conducted comprehensive analysis of 500,000+ customer service transactions** using Python data visualization libraries (Pandas, Matplotlib) and implemented automated data aggregation systems to extract actionable insights.

AQSTICA S.A.S, Bogotá, Colombia

Business Intelligence Analyst

February 2018 - November 2020

- **20% improvement in targeted marketing and audience segmentation** using unsupervised learning techniques, predictive modeling in Python, and implementing intelligent analytics platforms.
 - **Enhanced data quality by 25% and cut processing time by 40%** by designing and implementing end-to-end data pipelines using Python, SQL and MongoDB with automated data processing workflows for large-scale analytics.
-

Education

University of British Columbia, Vancouver, Canada - Master of Data Science in Computational Linguistics
Universidad de los Andes, Bogotá, Colombia - Master in Information Technology - Bachelor in Industrial Engineering - Bachelor in Arts
Fundacion Universitaria Jorge Tadeo Lozano, Bogotá, Colombia - Graduate Diploma in Project Management

Awards & Achievements

- COLFUTURO Scholarship 2023
- Data Science for All (DS4A) 2018

Skills

AI & Machine Learning: LLMs (GPT-4, Claude, Gemini), RAG Systems, LangChain, Hugging Face, PyTorch, TensorFlow, Scikit-learn, Advanced Prompt Engineering, Knowledge Graphs, Semantic Search | **MLOps & Model Deployment:** AWS SageMaker, Amazon Bedrock, MLflow, Model Monitoring, CI/CD Pipelines, Hyperparameter Tuning, Model Versioning, Automated Retraining | **Cloud & Infrastructure:** AWS (SageMaker, Lambda, S3, CloudWatch), Azure OpenAI, Docker, Kubernetes, Microservices Architecture, Serverless Computing | **Data Engineering:** Document Processing, Unstructured Data Extraction, Vector Databases (FAISS), MongoDB, NoSQL, Real-time Data Pipelines, Feature Engineering | **Programming & Frameworks:** Python, JavaScript, FastAPI, ReactJS, NextJS, spaCy, Apache Tika, RESTful APIs | **Soft Skills:** Cross-functional Collaboration, Team Leadership, Technical Mentorship, Problem-solving, Stakeholder Communication
