

Daniel Andres Jimenez Riveros, MSc-MA

Vancouver, BC, Canada | da.jimenez166@gmail.com

Professional Summary

Data Engineer and former Software Developer at Amazon, with 5+ years of experience designing and building scalable data pipelines, ETL/ELT processes, and data infrastructure. Proficient in cloud technologies (AWS, Azure) with expertise in SQL, Python, and big data technologies. Bilingual in English and Spanish.

Work Experience

Arkangel AI, Remote

Senior ML Engineer

June 2024 - Present

- **Designed and implemented end-to-end data pipelines on AWS** integrating data from multiple sources to support machine learning models, improving data availability by 40% and reducing processing latency.
- **Built ETL workflows with Databricks** to process and transform electronic health records, achieving 95% accuracy in risk factor extraction for disease detection.
- **Architected a data lake solution using AWS S3, Azure Blob Storage, and data governance frameworks**, improving data quality and accessibility while ensuring compliance with healthcare regulations.

Rocketbrew, Vancouver, British Columbia, Canada - Co-op

Data Science

April 2024 - July 2024

- **Built scalable data pipelines** to ingest, process, and analyze data from 10,000+ websites using Databricks, Python, and Selenium.
- **Designed and implemented a knowledge base system** with ETL processes to maintain data on 8,000+ companies, enabling real-time analytics and reporting.
- **Optimized data storage and retrieval processes** using partitioning strategies and indexing, resulting in 65% improvement in query performance.

AMAZON, Remote

Business Intelligence Analyst

July 2021 - July 2022

- **Architected and maintained data lakes and warehouses on AWS** supporting analytics dashboards for 2,000+ analysts, implementing best practices for data governance and quality.
- **Designed ETL/ELT workflows using AWS Glue, Lambda, and S3** to process and transform diverse data sources into standardized formats for consumption by business intelligence tools.
- **Implemented data quality monitoring frameworks** to ensure accuracy and reliability of data pipelines, reducing incident rates by 35%.
- **Built and maintained ETL processes** to transform raw data into actionable insights using AWS services (Redshift, Glue, Athena) and SQL.
- **Improved data modeling processes** by implementing dimensional modeling techniques, enhancing report performance by 30%.
- **Engineered efficient data pipelines in Python**, reducing data processing time by 50% and enabling near real-time reporting for critical business metrics.

Information Technology Intern

January 2021 - July 2021

- **Developed data extraction and transformation scripts** using Python and AWS services to integrate diverse data sources for internal tools.
- **Created automated data pipelines** to process 500,000+ customer service transactions, enabling efficient data analysis and trend identification.

AQSTICA S.A.S, Bogotá, Colombia

Data Engineer

February 2018 - November 2020

- **Designed and implemented ETL pipelines** using Python, SQL, and MongoDB to integrate data from multiple sources for customer segmentation and analysis.
- **Built data quality monitoring frameworks**, enhancing data quality by 25% and reducing processing time by 40% through improved data pipeline architecture.

Education

University of British Columbia, Vancouver, Canada - Master of Data Science in Computational Linguistics

Universidad de los Andes, Bogotá, Colombia - Master in Information Technology - Bachelor in Industrial Engineering - Bachelor in Arts

Fundacion Universitaria Jorge Tadeo Lozano, Bogotá, Colombia - Graduate Diploma in Project Management

Languages

- English (Fluent)
- Spanish (Native)

Certifications & Awards

- | | |
|--|------|
| Azure Data Engineer Associate | 2024 |
| AWS Certified Data Analytics - Specialty | 2023 |
| COLFUTURO Scholarship | 2023 |
| Data Science for All (DS4A) | 2018 |

Technical Skills

Data Engineering: ETL/ELT, Data Pipelines, Data Modeling, Data Warehousing, Data Lakes, Databricks, Apache Spark, PySpark, Airflow, SQL, NoSQL | **Cloud Platforms:** AWS (S3, EC2, Lambda, Glue, Redshift, Athena), Azure (Data Factory, Data Lake Storage, Blob Storage, Databricks) | **Programming:** Python, SQL, Scala, Java, R, Pandas, NumPy | **Data Governance:** Data Quality, Data Catalogs, Metadata Management | **Other:** Git, Docker, Kubernetes, CI/CD, REST APIs, MongoDB
