

Daniel Andres Jimenez Riveros, MSc-MA

Vancouver, BC, Canada | da.jimenez166@gmail.com | linkedin.com/in/daniel-jimenez-78500117a

Professional Summary

Software Engineer with 5+ years of experience in developing AI-enabled applications, backend systems, and scalable software solutions. Expertise in integrating machine learning with modern software engineering practices, cloud platforms, and full-stack development using languages like Python, JavaScript, and TypeScript. Proven track record in building robust, production-ready systems with automated workflows, monitoring, and CI/CD pipelines.

Work Experience

Apexon, Vancouver, BC, Canada

Senior Machine Learning Engineer

June 2025 - Present

- **Projected +\$0.8B net new revenue from prioritized ISV (Independent Software Vendors) verticals within the first launch year** by developing an AI agent for a payment platform for a McKinsey client, leveraging Python, .NET, Dapr, AWS, and LangGraph to build scalable, intelligent automation solutions.
- **Improved code quality and reliability by 90%** by creating comprehensive test suites following DevOps and Agile development practices, achieving 90% line and branch coverage through automated testing frameworks in Python and .NET, ensuring robust deployment pipelines.

Arkangel AI, Remote

Senior Machine Learning Engineer

June 2024 - June 2025

- **Reduced time and cost by 70%** by developing document AI solutions using computer vision (OpenCV, PyTorch) and VLM models for automated invoice processing and provider verification, implementing image preprocessing pipelines, object detection, and OCR workflows for healthcare institutions using Azure cloud services.
- **Generated up to \$50k monthly revenue** by implementing MLOps pipelines with AWS SageMaker, PyTorch, CloudWatch, Lambda, and S3, deploying scalable ML models including computer vision algorithms for medical image analysis with automated model monitoring and CI/CD integration, reducing infrastructure costs by 50%.
- **Targeted \$12B+ LATAM healthcare market** by developing an AI agent for Electronic Health Records using AWS Fargate, Docker, RAG, LangGraph, FastAPI, and Hugging Face models with SFT and RL techniques.

Insightly, San Francisco, CA & Colombia

AI Project Consultant

March 2025 - September 2025

- **Impacted 1,000+ legal cases** by consulting on intelligent chatbot and AI agent development for enterprise case management systems, recommending Amazon Bedrock, FastAPI, NextJS, LangChain, and FAISS vector database with knowledge graph implementation.

The University of British Columbia, Vancouver, British Columbia, Canada

Graduate Research Assistant

March 2024 - August 2024

- **Achieved 90% recall in Alzheimer's detection model** by developing and optimizing deep learning algorithms using PyTorch and TensorFlow, implementing transformer-based models and CNNs for multi-modal analysis (speech + imaging), with hyperparameter tuning and rigorous model evaluation using transfer learning techniques.

AMAZON, Remote

Software Developer Engineer

July 2022 - August 2023

- **Managed 2 junior developers** while leading full-stack development of customer service dashboards, implementing efficient ML inference pipelines using JavaScript, ReactJS, D3.js, Redux RTK, and microservices architecture.
- **Empowered over 300+ e-commerce leaders** by architecting scalable backend services and RESTful APIs in TypeScript, ExpressJS, and NodeJS, integrating AI-driven insights and real-time data processing capabilities.

Information Technology Intern

January 2021 - July 2021

- **Benefited 9,000+ Amazon employees** by developing full-stack analytical tools for internal use, leveraging JavaScript, ReactJS, Flask, and NodeJS with real-time data processing capabilities.
- **Conducted comprehensive analysis of 500,000+ customer service transactions** using Python data visualization libraries (Pandas, Matplotlib) and implemented automated data aggregation systems to extract actionable insights.

AQSTICA S.A.S, Bogotá, Colombia

Business Intelligence Analyst

February 2018 - November 2020

- **20% improvement in targeted marketing and audience segmentation** using unsupervised learning techniques, predictive modeling in Python, and implementing intelligent analytics platforms.
 - **Enhanced data quality by 25% and cut processing time by 40%** by designing and implementing end-to-end data pipelines using Python, SQL and MongoDB with automated data processing workflows for large-scale analytics.
-

Education

University of British Columbia, Vancouver, Canada - Master of Data Science in Computational Linguistics (2023-2024)
Universidad de los Andes, Bogotá, Colombia - Master in Information Technology (2018-2020) - Bachelor in Industrial Engineering (2014-2018) - Bachelor in Arts (2014-2018)
Fundacion Universitaria Jorge Tadeo Lozano, Bogotá, Colombia - Graduate Diploma in Project Management (2017)

Awards & Achievements

- COLFUTURO Scholarship 2023
- Data Science for All (DS4A) 2018

Skills

Programming Languages: Python (Expert), JavaScript, TypeScript, C++, Java, C# | **Software Development:** Full-Stack Development, Backend Systems, RESTful APIs, Microservices Architecture, Object-Oriented Design, Service-Oriented Architecture, Code Review, Complexity Analysis | **AI/ML Integration:** PyTorch, TensorFlow, Scikit-learn, Computer Vision (OpenCV), NLP, RAG, LangChain, Hugging Face, AWS SageMaker, Azure AI | **Cloud & DevOps:** AWS (SageMaker, Lambda, Fargate, S3), Azure, Docker, Containerization, CI/CD Pipelines, Model Monitoring, Performance Optimization | **Data Engineering:** MongoDB, SQL, Real-time Data Pipelines, Data Preprocessing, Feature Engineering, Large-scale Dataset Management | **Soft Skills:** Cross-functional Collaboration, Project Ownership, Technical Presentations, Code Reviews, Mentorship, Safety-First Mindset
