

Daniel Andres Jimenez Riveros, MSc-MA

Vancouver, BC, Canada | da.jimenez166@gmail.com | linkedin.com/in/daniel-jimenez-78500117a | github.com/daanjiri

Professional Summary

AI/ML Engineer with 5+ years of experience specializing in developing intelligent AI agents, machine learning models, and AI-driven applications. Expertise in deep learning frameworks (PyTorch, TensorFlow), NLP, RAG systems, and MLOps pipelines. Proven track record in deploying production-ready AI systems with automated workflows, model monitoring, and CI/CD integration using Python, cloud platforms (AWS, Azure), and full-stack development.

Work Experience

Apexon, Vancouver, BC, Canada

Senior GenAI Engineer

June 2025 - Present

- **Projected +\$0.8B net new revenue from prioritized ISV (Independent Software Vendors) verticals within the first launch year** by developing an AI agent for a payment platform for a McKinsey client, leveraging Python, AWS, and LangGraph to build scalable, intelligent automation solutions with advanced ML model integration.
- **Achieved 96% performance in a production RAG system** by architecting retrieval pipelines with AWS OpenSearch, S3, Bedrock, LangGraph, Anthropic Claude and OpenAI APIs, and advanced prompt and context engineering, validated through DeepEval and Ragas evaluation frameworks with Langfuse observability.
- **Maintained and enhanced the production application stack in ReactJS and FastAPI** while expanding expertise into .NET, DAPR, and C++ to support cross-stack microservices development across the platform.

Arkangel AI, Remote

Senior Machine Learning Engineer

June 2024 - June 2025

- **45,000+ users engaged with an AI agent for electronic health record extraction** using AWS Fargate, Docker, RAG, LangGraph, FastAPI, and Hugging Face Transformers with SFT, LoRA/PEFT fine-tuning, and RLHF/DPO alignment techniques.
- **Generated up to \$50k monthly revenue** by implementing an auto machine learning/deep learning training platform with AWS SageMaker, PyTorch, CloudWatch, Lambda, S3, and NextJS, deploying scalable models for medical use cases.
- **Reduced time and cost by 70%** by developing document AI solutions using computer vision (OpenCV, PyTorch) and VLM models for automated invoice processing and provider verification, implementing image preprocessing pipelines, object detection, and OCR workflows for healthcare institutions using Azure cloud services.

Insightly, San Francisco, CA & Colombia

AI Project Consultant

March 2024 - September 2024

- **Impacted 1,000+ legal cases** by consulting on intelligent chatbot and AI agent development for enterprise case management systems, recommending Amazon Bedrock, FastAPI, NextJS, LangChain, and FAISS vector database with knowledge graph implementation.

AMAZON, Remote

Software Developer Engineer

July 2022 - August 2023

- **Empowered over 300+ e-commerce leaders** by architecting scalable backend services and RESTful APIs in TypeScript, ExpressJS, and NodeJS, integrating AI-driven insights and real-time data processing capabilities.
- **Benefited 9,000+ Amazon employees and analyzed 500,000+ customer service transactions** by developing full-stack analytical tools (ReactJS, Flask, NodeJS) and automated data aggregation pipelines using Python (Pandas, Matplotlib) to extract actionable insights.

Information Technology Intern

January 2021 - July 2021

- **Delivered UI/UX and front-end development for internal tools supporting 3 internal teams**, designing responsive ReactJS dashboards with Figma prototypes and SAS-based analytics integration for real-time data visualization and intuitive user experiences.

Education

University of British Columbia, Vancouver, Canada - Master of Data Science in Computational Linguistics (2023-2024)

Universidad de los Andes, Bogotá, Colombia - Master in Information Technology (2018-2020) - Bachelor in Industrial Engineering (2014-2018) - Bachelor in Arts (2014-2018)

Fundacion Universitaria Jorge Tadeo Lozano, Bogotá, Colombia - Graduate Diploma in Project Management (2017)

Selected Projects

Thorcast AI

2025 - Present

- **Generating \$5k+ monthly revenue** by building an on-premise Electron desktop application for banks that creates risk ML/DL models in minutes instead of months, automating the full pipeline (data ingestion, feature engineering, model training, evaluation) with an AI agent powered by Python, FastAPI, LangGraph, PyTorch, and Ollama for on-premise LLM inference.

Alzheimer’s Detection — UBC Master’s Thesis

March 2024 - August 2024

- **Achieved 90% recall in Alzheimer’s detection model** by developing and optimizing deep learning algorithms using PyTorch and TensorFlow, implementing transformer-based models and CNNs for multi-modal analysis (speech + imaging), with hyperparameter tuning and rigorous model evaluation using transfer learning techniques.

Awards & Achievements

- COLFUTURO Scholarship2023
- Data Science for All (DS4A)2018

Skills

AI/ML & GenAI: PyTorch, TensorFlow, Transformers, Hugging Face, Scikit-learn, LangChain, LangGraph, RAG, LoRA, PEFT, RLHF/DPO, OpenAI API, Anthropic API, Prompt & Context Engineering, Ollama, Computer Vision (OpenCV), NLP | **Programming Languages:** Python (Expert), JavaScript, TypeScript, C++, Java, C#, .NET | **MLOps & DevOps:** AWS (SageMaker, Lambda, Fargate, S3, Bedrock), Azure, Docker, Kubernetes, MLflow, Weights & Biases, Terraform/IaC, CI/CD Pipelines, Model Monitoring, Performance Optimization | **Data Engineering:** MongoDB, SQL, Pinecone, ChromaDB, Real-time Data Pipelines, Data Preprocessing, Feature Engineering, Large-scale Dataset Management | **Software Development:** Full-Stack Development, Backend Systems, RESTful APIs, Microservices Architecture, Object-Oriented Design, Service-Oriented Architecture, Code Review, Complexity Analysis
