

Daniel Andres Jimenez Riveros, MSc-MA

Vancouver, BC, Canada | da.jimenez166@gmail.com | linkedin.com/in/daniel-jimenez-78500117a

Professional Summary

Data Scientist with 4+ years of experience specializing in machine learning, NLP, and AI applications for policy evaluation and research. Proven expertise in analyzing structured and unstructured data to extract actionable insights for decision-makers. Strong background in data visualization, geospatial analysis, and applying advanced analytics to solve complex problems in multidisciplinary settings. Proficient in R, Python, and visualization tools with a demonstrated ability to communicate technical findings to non-technical stakeholders.

Work Experience

Arkangel AI, Remote

Senior Machine Learning Engineer

June 2024 - Present

- **Directed a cross-functional team of 4 ML engineers**, establishing best practices for ML model deployment and monitoring while achieving 40% reduction in response times.
- **Implemented AWS SageMaker for auto-training and inference pipelines**, reducing infrastructure costs by over 50% while maintaining model performance for healthcare applications.
- **Built comprehensive data visualization dashboards** using Python and R to analyze healthcare outcomes, enabling stakeholders to make evidence-based policy decisions.
- **Applied NLP techniques to extract structured information from unstructured medical texts**, achieving 95% recall in identifying key health risk factors from electronic records.

The University of British Columbia, Vancouver, British Columbia, Canada

Graduate Research Assistant

March 2024 - August 2024

- **Achieved 90% recall** in developing deep learning algorithms for Alzheimer's detection through transformer-based speech and text models, optimizing for performance at scale.
- **Streamlined policy-making for 121,000 war victims** using production-grade RAG techniques with LangChain and LLMs, demonstrating expertise in applying generative AI to complex real-world problems.
- **Implemented and optimized NLP models** using dependency parsing and transformer architectures, improving downstream ML model performance by 30%.

Rocketbrew, Vancouver, British Columbia, Canada - Co-op

Computational Linguistic Engineer

April 2024 - July 2024

- **Designed and implemented data science pipelines** for automating text analysis across diverse sources, resulting in an 80% increase in engagement metrics.
- **Built and maintained a comprehensive knowledge database with information on 8,000+ companies**, using SQL and Python for efficient data storage and retrieval.
- **Developed automated data collection systems processing 10,000+ websites**, implementing data quality checks and cleaning processes for ensuring analytical integrity.

AMAZON, Remote

Software Developer Engineer

July 2022 - August 2023

- **Led development of customer service dashboards** with managerial responsibilities for 2 junior developers, implementing efficient ML inference pipelines in Javascript, ReactJS, D3.js, Redux RTK.
- **Empowered over 300+ e-commerce leaders** by architecting scalable services and RESTful APIs in TypeScript, ExpressJS, and NodeJS.

Business Intelligence Analyst

July 2021 - July 2022

- **Achieved 90%+ accuracy in machine learning models (regressions, time series, neural networks)**, enhancing operational **marketing decisions** using Scikit-learn and PyTorch.
- **30% boost** in product optimization and development through strategic ML model selection and feature engineering using EDA insights.
- **Achieved a 50% reduction in data processing time**, significantly accelerating project timelines by streamlining data preprocessing workflows with Python.

Information Technology Intern

January 2021 - July 2021

- **Created analytical tools for internal use** leveraging JavaScript, React, Flask, and NodeJS that benefited 9,000+ Amazon employees.
- **Conducted comprehensive analysis of 500,000+ customer service transactions** using Python data visualization libraries (Pandas, Matplotlib) to extract actionable insights.

AQSTICA S.A.S, Bogotá, Colombia

Business Intelligence Analyst

February 2018 - November 2020

- **20% improvement in targeted marketing and audience segmentation** using unsupervised learning techniques and predictive modeling in Python.
- **Designed and implemented end-to-end data pipelines** using Python, SQL and MongoDB, enhancing data quality by 25% and cutting processing time by 40% for large-scale analytics.

Education

University of British Columbia, Vancouver, Canada - Master of Data Science in Computational Linguistics
Universidad de los Andes, Bogotá, Colombia - Master in Information Technology - Bachelor in Industrial Engineering - Bachelor in Arts
Fundacion Universitaria Jorge Tadeo Lozano, Bogotá, Colombia - Graduate Diploma in Project Management

Awards & Achievements

- COLFUTURO Scholarship 2023
- Data Science for All (DS4A) 2018

Skills

Technical Leadership: Team Management, Cross-functional Collaboration, ML System Design, Pipeline Optimization | **Data Science & Evaluation:** Machine Learning (Supervised/Unsupervised), ML Inference Pipelines, NLP, Statistical Analysis, Data Visualization, Evaluation Methodologies | **Programming:** Python (Pandas, NumPy, Scikit-learn, NLTK, Matplotlib, Seaborn), R (ggplot2, dplyr, tidyr), SQL, JavaScript | **Data Management:** Database Design, ETL Pipelines, Data Cleaning, Feature Engineering, Taxonomy Development | **Visualization & GIS:** Tableau, PowerBI, D3.js, ArcGIS, QGIS, Geospatial Analysis, Interactive Dashboards | **Cloud & Tools:** AWS (EC2, S3, Lambda), Google Cloud, Excel (Advanced), Git, MongoDB, API Development, TensorFlow, PyTorch
